EMPLOYMENT

Software Engineer	Cisco Systems	Sept 2016 - Present
<ul style="list-style-type: none">Working on Web Application based on Flask, MongoDB, MySQL, React & Redux.Implemented generic notification system which notifies based on latest record, insufficient state, threshold levels, etc.Designed a Admin System to grant access control for entire organizationIntegrated cflow into the system to achieve code-coverage.		
Java Development Intern	Genesys Telecommunications	May 2015 - Dec 2015
<ul style="list-style-type: none">Designed a scalable data architecture using Open-source software viz. Log-courier, Logstash, Elasticsearch & Kibana (ELK) with searchers, masters, data-nodes & indexers, currently ingesting 11,000 events per second.Customized Logstash filters in Ruby (JRuby), Perl scripts & Java indexing modules to ingest synthesized data.		
Senior Systems Engineer	Infosys Ltd.	Sept 2011 - Aug 2014
<ul style="list-style-type: none">Application Developer for a J2EE application titled "VPN automation" which automates whole VPN order processing till the step of provisioning,Reduced redundancy in code and number of database connections by implementing a Generic Database Service in Hibernate using JAX-WS framework & Java Reflections.Spearheaded the migration of Web Services & Web Applications from Tomcat 6.0 to Weblogic 12c.		
Teaching Assistant	Northeastern University	Jan 2016 - July 2016
<ul style="list-style-type: none">Teaching Assistant for Information Retrieval in Spring 2015, Spring 2016 & Summer 2016.		

EDUCATION

M.S. in Computer Science	Northeastern University	Sept 2014 - July 2016
B.E in Computer Engineering	University of Mumbai	Aug 2007 - May 2011

TECHNICAL EXPERIENCE

- Parallel Data Processing Framework (Java, EC2, S3):** Designed & developed own Map-Reduce framework in Java, which runs on AWS EC2 with S3 as storage and locally.
- Data Science & Big Data Analytics (EMR, S3, Java, Hadoop, R):** Analysed Airline on-time performance datasets to predict Missed Connections, Delayed Flights, Routing Details, etc. by building models using Elastic MapReduce & Hadoop.
- Social Network Analysis (D3.js, Java):** Solved the puzzle of the most influential people in the social network in Enron dataset. Implemented algorithms such as Betweenness centrality, Closeness centrality, Floyd-Warshall and Degree centrality on a 16k graph in Java. Visualized the social network using D3.js.

Languages and Technologies

- Java, JavaScript, ECMAScript, React, Redux, Angular 4, NodeJS, AngularJS, CSS, REST, Python, CSS, D3.js
- MySQL, MongoDB, Elasticsearch, Oracle, Amazon S3
- Git/Github, Zookeeper
